

135th Synod of the Diocese of Niagara Green Parish Accreditation Program

The committee made a presentation.

Please refer to the [Greening Niagara website page](#) for details.

We are called to care for creation. We are concerned about the environment - sustain and renew the earth.

We are concerned about climate change. We were asked to create an accreditation program by last synod.

We have examined sustainable best practices and developed a program tailored to our diocese.

Our green parish accreditation program is intended to help parishes to live out the goals. There are three levels of accreditation.

Our work would be incomplete if we only change our corporate behaviour. There is a Niagara home challenge to our own personal homes.
